Professional Summary

Technical Lead with 10+ years of experience building and leading back-end platforms in Python (Django REST Framework), Node.js and PHP. Currently leading a revenue cycle management platform for a US healthcare network, including its migration to Python and PostgreSQL. Previously owned the API layer of a white-label commerce platform running as 4 brands across 3 countries, and led its rewrite from CodeIgniter to Node.js. Strong in API design, legacy system migration, healthcare data integration and payment systems, with hands-on experience in team leadership, code review and delivery.

Technical Skills

- Languages: Python, JavaScript (Node.js), PHP, SQL
- Frameworks: Django REST Framework, Express.js, Sequelize, Laravel, CodeIgniter
- Databases: MySQL, PostgreSQL, MS SQL
- Cloud & DevOps: AWS (EC2, S3, SNS, SQS), Azure, Docker, Site-to-Site VPN, Git
- Automation & Tools: Playwright, Postman, Jira, Firebase
- Domains: US Healthcare RCM, E-commerce Marketplaces, Payment Systems
- Practices: REST API design, system migration, code review, release management, Agile Scrum

Professional Experience

Technocruitx Universal Services Pvt. Ltd., Ahmedabad, Gujarat

Technical Lead *Mar 2024 – Present*

- Lead a team of 3 developers building RCM Analytix, a revenue cycle management platform for a US community health network covering coding, billing, denial management, payment posting and analytics dashboards. Own code reviews, releases and AWS deployments.
- Led the migration of the platform's backend to Python with Django REST Framework, and of its database from MySQL to PostgreSQL.
- Integrated the client's eClinicalWorks database (MS SQL on Azure) through a site-to-site VPN, schema mapping and automated sync pipelines, giving billing teams near real-time data.
- Automated eClinicalWorks report downloads and data processing using Python and Playwright.
- Built an APG (Ambulatory Patient Groups) reimbursement calculator applying discounting, bundling, packaging, base rates and procedure-specific weights.

Verve Systems Pvt. Ltd., Ahmedabad, Gujarat

Senior Software Engineer *Jan 2019 – Mar 2024*

- Designed and owned the API layer of Lokaly, a white-label commerce platform running as 4 brands across India, the USA and Italy, serving 6 apps (customer, store, rider, picker, POS, dine-in) on web, Android and iOS.
- Led a 12-month rewrite of the back-end from CodeIgniter to Node.js (Express, Sequelize), with a separate database per brand.
- Led the 3-member API team and defined the API contracts for a 13-member engineering team (Flutter, Angular, Next.js).
- Integrated Stripe, Authorize.net, Razorpay and Paytm, and built the wallet, partial refunds, vouchers, and a credit ledger with automated payment reminders.

Zero Gravity Web Services LLP, Ahmedabad, Gujarat

PHP Developer *Apr 2017 – Dec 2018*

- Built the web application for Apna Data, a subscription-based cloud storage platform with online file playback, automatic backup and trash history (CodeIgniter, PHP, MySQL).

App Bits Pvt. Ltd., Ahmedabad, Gujarat

Junior PHP Developer *Apr 2016 – Mar 2017*

- Built the web platform and backend for an online word-learning product with Android and iOS apps (CodeIgniter, PHP, MySQL).

Sri Samarth Utility Services Pvt. Ltd., Ahmedabad, Gujarat

Junior PHP Developer *Aug 2015 – Feb 2016*

- Developed features for a startup product, including mobile recharge, using CodeIgniter and Zend.

H.K. Computer and Sun InfoTech, Ahmedabad, Gujarat

Tally Developer *Jan 2013 – Jan 2015*

- Built custom Tally solutions in TDL (Tally Definition Language) for business clients, including custom invoices and complex reports, and led a team of 2 developers at H.K. Computer.

Education

- B.E. in Information Technology, Charotar Institute of Technology, Changa (GTU), 2012
- Diploma in Information Technology, Government Polytechnic, Himmatnagar, 2009
